

GSL General Hospital & GSL Medical College were established by GSL Educational Society with the noble objective of offering medical, nursing and paramedical education, with special care and concern for the rural side of the country. During the fifteen years of its successful saga, the institute could evolve into one of the premier post graduate institutes in India in private sector.

Situated on a sprawling and sylvan eighty acre campus, the institute has been built to suit world class standards in terms of human resources and infrastructure. Meticulous care has been taken in developing all the amenities and facilities on the campus.

The institute is conveniently located right on the NH5 connecting Vijayawada and Visakhapatnam, 12 KM from Rajahmundry, the literary and cultural capital of Andhra Pradesh.

Assistant Professor - Dept. of DVL,  
GSL Medical College, Rajahmundry.

**Dr. A. Krishna Phaneendra Prasad**

*Dear Doctor,*

Warm Greetings from the Organising Committee. For the first time in India we are organising a **Conference on Community Dermatology** with a view to promoting Skin Health for All. The objective of the conference is to create awareness among general practitioners and public about common skin diseases and their prevention and the importance of skin hygiene.

During this conference, Community Dermatology Society of India will launch an online one year course in Dermatology for all general practitioners and after successful completion of the programme, a certificate, accredited by Karnataka Medical Council, will be awarded.

We request all the general practitioners and medical officers working in government and non-government organisations to avail themselves of this opportunity to update their skills in order to manage common skin problems better.

As we want a good number of doctors to be benefited out of this conference, the programme is offered without any registration fee.

We are happy to inform you that we have applied for MCI accreditation for 2 CME hours.

*- Organising Committee*
